ENGLISH & LANGUAGES FACULTY

ENGLISH

Course Content

Year 9 students follow a course based on Level 4 of English in the New Zealand Curriculum. The course is designed around the three major strands of:

Written Language: Oral Language:
- Reading - Listening
- Writing. - Speaking.

Visual Language:
- Presenting
- Viewing.

Leads to

Year 10 English.

ALP – Advanced Learning Programme

Half Year Course

Course Content

This course aims to develop and enhance literacy skills across the curriculum. It will provide opportunities to bridge any gaps in students' learning, helping to prepare them for Year 10.

Students will be explicitly taught reading strategies to improve both fluency and comprehension. They will be exposed to academic vocabulary so they can access all areas of the curriculum with more confidence. Students will also participate in a variety of listening activities.

FRENCH

Half Year Course

Course Content

An introduction to the French language and culture, where students will gain an appreciation of customs, festivals and lifestyles of the people of the French-speaking world. Students will be given an opportunity to communicate in simple French with our New Caledonian visitors. Topics covered in the course are:

- Basic introductions and greetings.
- How to exchange basic information about yourself (name, age, feelings, birthdays, physical characteristics and personalities).
- Colours, animals, weather, family.
- Monthly culture activities.

Special Conditions

It is highly recommended that students pay an access fee of \$15 to enable them to log onto the Language Perfect website to assist with vocabulary homework.

Leads to

Year 10 French.

JAPANESE

Half Year Course

Course Content

An introduction to the Japanese language and culture, where students will gain an appreciation of customs, festivals and lifestyles of the people of Japan. Students will learn to communicate in simple Japanese with our Japanese visitors and exchange emails, texts and letters with sister school students. They will also learn to read and write most of the Hiragana script.

Topics covered in this course are:

- Basic introductions and greetings and how to exchange basic information about yourself.
- Where you and others live in the world.
- Nationality and languages, important dates.
- Japanese traditional sports, likes and dislikes.
- Colours, animals, weather.
- Monthly culture activities.

Leads to

Year 10 Japanese.

INTRODUCTION TO TE REO ME NGĀ TIKANGA MĀORI

Half Year Course

Course Content

This half year course aims to introduce students to basic Te Reo and Tikanga.

Some of the topics covered are:

- Mihimihi (basic introductions and greetings).
- Whānau (family).
- Tikanga me ngā kawa o te marae (marae customs and marae protocol).

Special conditions

It is highly recommended that students pay an access fee of \$10 to enable them to log onto the Education Perfect website to assist them with vocabulary homework.

Leads to

Year 10 Māori – full year course.

We recommend that all students participate in kapa haka or waka ama to support and enhance their tikanga knowledge and ability to speak Māori.

TE REO ME NGĀ TIKANGA MĀORI

Full Year Course

Course Content

This full year course includes basic Te Reo and Tikanga Māori and covers Levels 1 to 3 of the New Zealand Curriculum. Students will be able to gain confidence and competence in speaking, listening, reading, writing, presenting and viewing Te Reo Māori in familiar contexts.

Some of the topics covered are:

- Mihimihi (basic introductions and greetings).
- Whānau (family).
- Tikanga me ngā kawa o te marae (marae customs and marae protocol).
- Kāinga (home).
- Kura (school).
- Pakiwaitara (legends).
- Kapa Haka, Māori games and pastimes.
- Manu Kōrero speeches.

Special conditions

It is highly recommended that students pay an access fee of \$20 to enable them to log onto the Education Perfect website to assist them with vocabulary homework. Travel to Manu Kōrero Speech Competition \$15.

Leads to

Year 10 Māori or NCEA Level 1.

We recommend that all students participate in kapa haka or waka ama to support and enhance their tikanga knowledge and ability to speak Māori.

MATHEMATICS FACULTY

MATHEMATICS

Special Conditions

It is recommended that students have a scientific calculator with a fraction key (preferably Casio FX82) and basic mathematical equipment, *i.e.* ruler, compass, protractor; along with an Alpha homework book (approximately \$18).

Course Content

The course is based on Mathematics in the New Zealand Curriculum (Level 4/5). The strands of number and algebra; geometry and measurement; and statistics and probability are covered as well the mathematical processes of problem solving; developing logic and reasoning; and communicating mathematical ideas.

Teaching and learning in the classroom, and assessment, will reflect the needs and abilities of the students.

Students will be given opportunities to:

- Gain confidence and competence in the use of numbers.
- Develop the skills of measurement.
- Develop geometrical knowledge and skills associated with shape and space.
- Generalise from patterns and relationships.
- Manipulate data.
- Participate in real mathematical situations so as to see the use of mathematics in every day life.

Leads to

Year 10 Mathematics.

HEALTH AND PHYSICAL EDUCATION FACULTY

LIFE SKILLS

One period per week

Course Content

Students will gain the knowledge, skills, attitudes and values to enjoy a healthy lifestyle and to contribute to the wellbeing of others. The themes covered in life skills take on a progression suitable for that age group.

The Board of Trustees is required to consult with the school community regarding the school's health programme, particularly with regard to sexuality education. The parents will be notified in the school newsletter when the sexuality education classes will commence for their child. Below is the course outline and further information is available from the college office.

- Cornerstone values of life at Taupo-nui-a-Tia College.
- Nutrition.
- Alcohol and drug education.
- Interpersonal skills.
- Study skills and careers.
- Sexuality education.
- Cyber safety.
- Water safety and survival.

PHYSICAL EDUCATION

Two periods per week

Special Conditions

- Students must have the correct PE uniform, as described in the uniform regulations, available for purchase only from the college office.
- Subject charge \$10. This covers the cost of transport incurred in the course.

Course Content

Physical education contributes to personal and social development. Students are involved in activities that require individual endeavour and interaction with others while learning and developing the skills, tactics, and strategies for various sports and activities.

The course involves participation in adventure based learning, athletics, aquatics and water safety, fitness, cross country, gymnastics, dance, international games, ki-o-rahi, and a variety of modified games centred around participation, confidence, cooperation, inclusion, and competence.

Leads to

Year 10 Physical Education.

SCIENCE FACULTY

SCIENCE

Course Content

Science at Year 9 aims to develop science capabilities. Units of work are based on the New Zealand Curriculum.

Science education covers a series of context based topics offered throughout the year in suitably equipped laboratories.

By the end of this course students should be able to:

- Gather and interpret information.
- Use evidence to support ideas.
- Critique evidence.
- Make meaning of scientific representations.
- Engage with science.

Leads to

Year 10 Science.

SOCIAL SCIENCES FACULTY

SOCIAL STUDIES

The aim of social studies education is to enable students to participate in a changing society as informed, critical, confident and responsible citizens.

Course Content

The essence of social studies encompasses three main dimensions:

- Developing and understanding ideas about human society.
- Participating in society as an individual or part of a group in relation to these ideas.
- Developing an understanding of the personal and social significance of social studies ideas

These dimensions are taught via several units of study during the year such as:

- **Getting Together** –
How cultures may interact and the consequences of these interactions on cultures and societies.
- **On the Move** –
Why do people migrate and what are the consequences of this migration? Examples are selected from various contexts.

Students also develop a knowledge and understanding of events happening in the world around them through an ongoing current events program.

Leads to

Year 10 Social Studies.

ELP – Enhanced Learning Programme

The aim of ELP is to develop students' modes of thinking, to reason analytically and creatively and to extend their vocabulary to better express their thoughts and ideas. The students learn to work together to explore real issues that are currently faced by mankind, and also consider future issues of a global nature.

The classes are selected with input from contributing schools, parents, whanau and teachers. Places are limited and are usually offered to students who demonstrate wide academic ability. The course content is entirely process driven to develop students' thinking skills.

TECHNOLOGY FACULTY

DESIGN AND VISUAL COMMUNICATION

One Term Course

Special Conditions

Cost \$7.00 – covers the cost of take home materials used in this course.

Course Content

Design and visual communication at Year 9 is a short 10 week course which aims to introduce the importance and relevance of design and graphical communication in a present day context. Skills are taught through a series of design related tasks within projects that students have an interest in. Formal drawings are introduced to support research and creation of initial design ideas. A brief introduction to computer aided design (CAD) may also be offered.

Leads to

This course leads to design and visual communication in Year 10, as well as NCEA Levels 1 to 3. Students who have an interest in three dimensional design should consider taking this course.

DIGITAL TECHNOLOGIES

One Term Course

Course Content

Digital technologies is the term used to describe all areas of computing and falls under the technology learning area. In Year 9 students will be introduced to three areas of digital technologies:

- Digital information – this involves learning the fundamental concepts of common software applications such as a word processor, spreadsheet, database and desktop publishing.
- Digital media – demonstrate an understanding of the types of digital media, and how they are created.
- Digital programming – use the programme 'Scratch' to create a simple animation and introduce basic programming conventions.

Leads to

Year 10 Digital Technologies.

FOOD AND NUTRITION

One Term Course

Special Conditions

Cost \$30.00 – covers the cost of ingredients in practical lessons.

Course Content

Students learn about exciting developments in the world of food. A variety of skills are taught in the practical room where students get the opportunity to design, develop and cook a range of foods. Practical lessons are related to theory in the classroom where students get the opportunity to develop their knowledge, ideas and decision making.

Leads to

Year 10 Food and Nutrition.

TEXTILE MATERIALS

One Term Course

Special Conditions

Cost \$15.00 which includes all materials needed for a project to take home.

Course Content

The course follows the technology curriculum and involves designing and creating a project of own choice, meeting student skill level. Students learn to use a range of decorative techniques, including Shibori dyeing, printing, machine appliqué, hand and machine embroidery and much more.

Methods of Assessment

Design portfolio and a take-home project.

Leads to

Year 10 Textiles.

RESISTANT MATERIALS – METAL

One Term Course

Special Conditions

Subject charge \$20.00 – covers the cost of take home materials used in this course.

Course Content

This course is intended for students interested in exploring different mediums of resistant materials with an emphasis on metal. Students are encouraged to problem solve within the technological process and to develop skills in design and evaluation. Correct use of tools, machines and safety skills are an integral part of the course.

Leads to

Year 10 Resistant Materials.

RESISTANT MATERIALS – WOOD

One Term Course

Special Conditions

Subject charge \$20.00 – covers the cost of take home materials used in this course.

Course Content

Students will follow the technological process, developing skills in design and evaluation. A major part of this course is spent undertaking product production, which will involve the use of wood working tools and machines in the workshop.

Leads to

Year 10 Resistant Materials.

THE ARTS FACULTY

VISUAL ARTS

Half Year Course

Special Conditions

Subject Charge \$20.00. This covers the cost of all the take home materials used in the course.

Course Content

During this course, students will work in a variety of areas and media. Observational drawings and developmental work lead to work in one or more of the following media –

- Paint.
- Design.
- Collage and mixed media.
- Three dimensional work (sculpture).

Leads to

Year 10 Art.

DRAMA

Half Year Course

Special Conditions

Charge \$8.00. This covers the cost of all the take home materials used in the course and includes a professional performance or workshop.

Course Content

Learning and assessment activities are based around the four strands from the Arts Curriculum. Students explore the following while developing their knowledge of dramatic conventions, elements and techniques, in the context of storytelling and 19th Century society:

- Developing practical knowledge – using drama elements and conventions to create drama.
- Developing ideas – improvisation, drama creation.
- Communicating and interpreting – performance.
- Understand drama in context – theatre styles.

Leads to

Year 10 Drama.

MUSIC

Half Year Course

Course Content

This course introduces the language of music and gives the students practical opportunities to learn about melody, rhythm and harmony. Classroom instruments (keyboard, guitar, percussion) will be used for directed activities to perform and compose music. Every student will also have the opportunity to learn a new instrument in a small group, according to their ability.

Students are encouraged to be creative and expressive while learning the basics of reading and writing music.

Learning assessment activities based around the four strands in the Arts Curriculum will give feedback and guidance towards student ability and potential to continue with music studies:

- Developing practical knowledge – practical and written activities to explore music.
- Developing ideas – research and understand a composer's music.
- Communicating and interpreting – rehearse and perform tasks.
- Understand music – listening activities to understand musical genres.

A music take-home workbook will be issued in class and is a stationery requirement – cost \$8.

Opportunities for Extension and Further Study

Instrumental tuition is available within the school for orchestral instruments and runs concurrently throughout the year. For students to get the most benefit from these lessons they need to have their own instrument. Students interested in preparing for NCEA are strongly encouraged to be part of this programme. See our music department brochure for details.

Leads to

Year 10 Music.

DANCE

Half Year Course

Special Conditions

Any associated workshop cost may be extra.

Course Content

The Year 9 option dance programme is available to all Year 9 students regardless of ability or level of dance. The course covers –

- Introduction to dance terminology.
- Dance history.
- Introduction to dance composition, working in groups to create and choreograph dance pieces.
- A range of styles and genres.

Leads to

Year 10 Dance.

NCEA

- **How does NCEA work?**

Teachers will use standards to assess how well you perform in the different skills in a course. When you meet the standard, you'll earn credits towards the National Certificate in Educational Achievement.

- **How will I know which standards I'm entering for?**

Your teacher will tell you which standards are available for each course and how they'll be assessed. Standards are indicated in the Year 11, 12 and 13 course booklets. Credits from all of the achievement and unit standards you achieve count towards your NCEA.

Credits can count for other National Certificates too. Talk to your teacher to find out what other certificates are offered as part of your course.

- **How do students complete a qualification?**

NCEA levels and certificates

There are three levels of NCEA certificate, depending on the difficulty of the standards achieved. At each level, students must achieve a certain number of credits to gain an NCEA certificate. Credits can be gained over more than one year.

NCEA	Requirements
Level 1	80 credits are required at any level (level 1, 2 or 3) including a minimum of 10 literacy credits and 10 numeracy credits. The literacy and numeracy standard pathways are shown in the year 11, 12 and 13 course booklets.
Level 2	60 credits at level 2 or above + 20 credits from any level The Level 1 literacy and numeracy requirements must also be met.
Level 3	60 credits at level 3 or above + 20 credits from level 2 or above The Level 1 literacy and numeracy requirements must also be met.

Credits gained at one level can be used for (or count towards) more than one certificate. They may also be used towards other qualifications. For example, unit standards in the domain 'generic computing' might be used towards a Level 2 NCEA certificate, as well as towards a National Certificate in Computing (Level 2); or 20 credits gained at Level 1 can also count towards a Level 2 NCEA certificate.

REQUIREMENTS FOR UNIVERSITY ENTRANCE

- Attain NCEA Level 3.
- Achieve 14 credits at level three in **each of three subjects from the list of approved subjects**. The list of approved subjects will consist of subjects derived from the *New Zealand Curriculum* with achievement standards at Level 3.
- Achieve UE numeracy – 10 credits at Level 1 and above from specific achievement standards, or three specific numeracy unit standards.
- Achieve UE literacy – 10 credits (five in reading and five in writing) at Level 2 and above from specific standards.
